

Ethics and Environmental policy statement

Footprint Friends (FPF) is an eco platform for children whose purpose is to support environmental education and child led action in particular within built environments. Being web based, our organization is 'light' on the environment and works with ethical partners to deliver authentic experiences for the young people who participate with our programmes and activities.

Ethical partnerships

In partnering our request for matched ethics is simply, that our partners will thoughtfully turn the tide on waste and resource abuse by designing their business activities (whatever they may be) so that every aspect is delivered with future generations in mind.

Footprint Friends is proud to be enabling a movement for children; our principle initiative is called WOW – Wipe Out Waste. Our job (working with schools and industry) is to provide considered answers with demonstrable vision and innovation. This intergenerational dialogue will bring focus sharply on longevity value and sustainability. It will also provide the stimuli for real commitment and evidence based action for our partners Corporate and Social Responsibility policies.

Volunteers

Footprint Friends achieves more with the help and support of dedicated volunteers. Volunteers are approved in advance and form an important part of our wider 'friendship' network. All who participate recognize the importance of promoting child voice on the subject of our environment, sustainability and climate change.

Environment

Footprint Friends will comply with all relevant environmental legislation and is committed to minimizing the impact of its activities on the environment. We accept responsibility for any harmful effects our operations have on both the local and global environment and are committed to reducing them.

The key points of its strategy to achieve this are:

- Minimize waste by evaluating operations and ensuring they are as efficient as possible.

- Minimize emissions through the selection and use of travel

- Actively promote recycling both internally and amongst our members, partners and suppliers.
